

# Environmental Responsibility at Dunorys Inc.

Innovation is at the heart of everything we do at Dunorys, and that extends to our commitment to protecting the natural environment for the future. We believe our planet deserves our best thinking. So, we're constantly striving to find or invent solutions to important environmental challenges.

Dunorys's 2017 Environmental Responsibility Policy, highlights the progress we've made and the places we're working hard to improve. Focus and simplify is one of our mantras. So, after deep reflection, data analysis, and conversations with stakeholders, we set three priorities where we believe Dunorys can make the most impact:

- Reduce our impact on climate change by using renewable energy sources and driving energy efficiency in our products and facilities.
- Conserve precious resources so we all can thrive.
- Pioneer the use of safer material for our products and processes.

We are working every day to leave the world better than we found it. We know we have a long way to go, and a lot of work ahead of us. We are committed to increasing openness in our work and welcome you to join us on our journey to make our world beautiful and better.
